

Dear Brussels recruiters, Maïlis and Samuel,

After researching a number of organisations for spring internships in the field of web/app developing, I was especially impressed with what I have read about Adneom and its positive thinking mindset as a corporate vision.

In May, I will be completing my intensive course at BeCode and my plan is to continue in developing. I have, not only a strong interest in the languages you ask as primary ones, which in my case are almost part of my map of learning skills, but also I'm willing to participate in your projects. In BeCode we are working mainly by ourselves, always monitored by a coach. Through this type of hands on experience, I hope to further develop my professional background in preparation for a position in the developing field.

I would appreciate the opportunity to further discuss the possibility of an internship with Adneom.

I am willing to do a 3 months internship, starting the 23rd of April.

You can contact me at [linkedin.com/in/pedroroval](https://www.linkedin.com/in/pedroroval) or 0484-16-95-08.

Sincerely,

Pedro Manuel Rodriguez Valverde
